Electives		9
Total Credits		30

A special option leading to the Master of Science in Architecture degree is available for those students who already possess an accredited NAAB professional degree in architecture (B.Arch. or M. Arch.) or its foreign equivalent. This option is designed to accommodate the needs of students who wish to do advanced work beyond that required for the professional degree. Applicants must specify in detail the nature of the proposed course of study for review and approval by the admissions committee prior to their admission. The School currently provides resources for advanced work in architectural design and urban design.
