CURATION AND MANAGEMENT OF DIGITAL ASSETS, POST-MASTERS CERTIFICATE (P.M.C.)

12 credits required

The Curation and Management of Digital Assets (CMDA) Certificate is a post-master's program that focuses on instruction about and research into the creation, management, and use; the long-term preservation; and the current and future access to digital assets in a variety of disciplines and sectors of the economy. It is a four-course, fully online certificate designed for working professionals who need training in next-generation cloud computing technologies, tools, and resources to help them evaluate, select, and implement digital curation solutions.

The CMDA Certificate requires the completion of four courses, with a minimum 3.0 GPA. The following courses are taken in sequence within one calendar year.

Course	Title	Credits
Core Requirements		
INST640	Principles of Digital Curation	3
INST641	Policy and Ethics in Digital Curation	3
INST742	Implementing Digital Curation	3
INST744	Solving Problems in Digital Curation - Capstone Course	3
Total Credits		**12**
