HEALTH DATA ANALYSIS (Z140)

Graduate Certificate Program College: Public Health

Program Overview

There is a substantial need among health professionals to learn the statistical methods and computer programming skills necessary to organize and analyze health-related data, especially data collected for a specific purpose or readily available in national surveys. Designed for working professionals, the Graduate Certificate in Health Data Analysis (GC-Health Data Analysis) emphasizes statistical methods and the computer programming skills required to manage and analyze health data sets. The program consists of the most relevant quantitative analysis courses that provide students with the tools needed to improve their data analysis skills and advance their professional careers. The GC-Health Data Analysis has a strict focus on health data applications allowing students sufficient mastery of the material to improve their understanding of health data management and analysis. By addressing statistical survey techniques and software, the program covers the basic statistics and programming concepts which are the foundation of management and analysis of health data, opening doors to students who lack sophisticated statistical coursework or have no experience with computer programming.

The GC-Health Data Analysis has a 12-credit, four-course curriculum that includes statistics, data management, and data analytics. The program can be completed in as little as twelve months of continuous study while minimally disrupting personal and professional life. Upon completion, students will be ready to analyze healthcare data in a practical setting, demonstrate effective problem-solving, time management, and critical thinking skills, and communicate findings to a wide variety of audiences. The GC-Health Data Analysis features online instruction, which offers greater flexibility and increased opportunity to tailor learning in a way that accommodates personal and professional responsibilities. UMD's online learning environment delivers online content through easy-to-use web-based technology that enables learning in an engaging, interactive environment. Instruction is provided by university faculty and experts in the field. The program uses the semester academic calendar with classes held during fall and spring semesters (16 weeks each) and Summer Sessions (two 6-week sessions).

CONTACT

The GC-Health Data Analysis is offered through the Department of Epidemiology and Biostatistics in the School of Public Health. The program bridges the gap between the limited quantitative skills of professionals currently working in the healthcare or public health fields and the advanced quantitative skills required in the health care sector through a formalized curriculum.

Jamie Trevitt, PhD, MPP

Director of Graduate Student Services

Assistant Clinical Professor

ADMISSIONS

The **Certificate in Health Data Analysis (Online)** accepts applications through the TerpEngage Graduate Admissions System (https://terpengage.force.com/community/CustomLoginPage/?GradApp=True).

GENERAL REQUIREMENTS

- · Bachelor's degree
- Statement of Purpose (https://advancedengineering.umd.edu/ application-process/)
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/))
- · Response to personal experiences question(s)

Program-specific requirements

- Applicants to the Health Data Analysis certificate program must have completed all of the requirements for a baccalaureate degree prior to their acceptance into the program, with particular emphasis on applicants' data analytics background
- · Letter of Recommendation (optional)
- CV/Resume
- · Description of Research/Work Experience

Note for applicants with foreign credentials:

- The UMD graduate application requires uploading unofficial transcripts issued in the original language along with a literal English translation. Visit the Graduate School website for additional information (https://gradschool.umd.edu/admissions/international-admissions/)
- Evidence of English Language proficiency is required if the applicant does not hold a degree from a U.S. institution or one of the Englishspeaking countries listed on the Graduate School website (https:// gradschool.umd.edu/admissions/english-language-proficiencyrequirements/)

APPLICATION DEADLINES

| Type of Applicant | Fall Deadline |
|------------------------|---|
| Domestic/International | N/A |
| | This program admits for the summer term only. See the department website below for deadlines. |
